

Why does Richard Landon of Richard Landon Design value Trends?

“Trends is the only publication I save in its entirety. I buy multiple copies and ask my clients to flag their ‘likes’ and ‘dislikes’. We then look at their preferences with respect to shapes, patterns, textures, and use of color. With such a stylistic blend of beautifully photographed projects, representing worldwide tastes, Trends stimulates the insights I need to plan a space that looks great, works well, and, most importantly, feels right.”

Richard Landon, CMKBD, began his design practice in 1978 and is the originator of the Designed by L.I.F.E.[™] process. His diverse background as a chemist, musician/composer, educator, importer, and cabinetmaker has led to numerous published and award-winning projects. Landon specializes in residential space planning for both remodels and new homes, providing unique cabinetry and solutions for his clients.
